

We are now a provider of Internet Protocol, or IP, unified group communication solutions. The products used in our solutions include our own proprietary products as well as products from other software and hardware vendors.

We have designed and customized standards based audio and voice collaboration solutions for prospective customers as part of a unified group communication system. We consider all aspects of a potential customer's information technology resources and existing telecommunications network in creating a design best suited for that customer. In 2013, we developed our own proprietary group communication solution and have built and installed four of these solutions as of the filing date of this report. Prior to developing our own solution we used *WAVE* software as the core component. We have designed, built and installed 20 unified group communication solutions as of the filing date of this report, 14 of which utilize *WAVE* software. In November 2013, we discontinued using *WAVE* software as a component in our unified communication solution installations.

Revenues have been generated from the design, construction and installation of the group communication systems. We have also generated revenues from maintenance and support contracts, once a unified group communication solution has been installed and tested. While we no longer sell *WAVE* based systems we will continue to support the installations that we have previously installed. We also sell our proprietary line of Internet Protocol Gateways which we have branded the *AudioMate 360 IP Gateway*, discussed below. These units are currently being sold directly to end-users and by Value Added Resellers ("VARs"). As of the date of this filing, we have approximately 10 active VARs, and we have sold our gateways to more than 1,000 end-users in the United States and 18 foreign countries.

We have developed an Internet Protocol Gateway which we call the *AudioMate 360 IP Gateway*. The *AudioMate 360 IP Gateway* has been designed to provide an Internet Protocol Gateway to users of unified group communications. The *AudioMate 360 IP Gateway* is available in different configurations which enable it to be used with various types of communications equipment.

Although other devices are available that perform the same or similar functions, we believe that our price for the *AudioMate 360 IP Gateway* is substantially lower than the prices others are presently charging for similar devices. If we are unable to provide the *AudioMate 360 IP Gateway* to our prospective customers at substantially lower prices than others are charging for similar gateways, our business will be materially adversely affected.

We do not have any other products at this time.

Acquisition of Certain Collabria Assets

In March 2015, the Company amended its Licensing Agreement with Collabria LLC of Tampa, Florida ("Collabria"). The Agreement grants the Company master distribution rights to market, sell and support Collabria's command and control software, trade-named ReadyOp. ReadyOp software is designed for fast, efficient access to information and for communication with multiple persons, groups and agencies. This agreement will remain in effect for an initial term of five years unless either the Company or Collabria sooner terminates the agreement. Upon expiration of the agreement, the Company's only obligation to Collabria shall be the payment of all outstanding obligations to Collabria. In September 2014, the Company formed ReadyOp Communications, Inc. (a Florida corporation), as a wholly owned subsidiary to facilitate the marketing of ReadyOp software. According to the terms of the agreement ReadyOp Communications will pay Collabria a royalty for all ReadyOp software sold.

In November 2016, the Company cancelled its Licensing Agreement with Collabria LLC of Tampa, Florida ("Collabria") and acquired all of the intellectual property related to Collabria's command and control software, trade-named ReadyOp. In addition the Company acquired Collabria's client list. In exchange for these assets the Company issued Collabria 3,000,000 shares of the Company's restricted Series E Convertible Preferred stock with a fair value of \$292,240. The Company assumed none of Collabria's liabilities.

Need for Unified Group Communications

Unified group communications and coordination within and between agencies for response actions to incidents and emergencies has been a challenge for many years. The result has been inefficiencies and in some cases the loss of lives, time and money during response activities. Governmental agencies, hospitals and other organizations experience these same interoperability failures.
